Hi dear all,

as the Underwater set decision was made really late,
we need some help to be able to achieve this in time.

* we need to be able to work on this set in Sered,
what would probably mean to extend the part of the location rental
of few days (Spoke to Patrik he is working on this part).

* we will be cutting & welding metal, so we need Firemen assistance for most of the time. Welds to be watched for some period after done.

* electrics & water & toilets on location pls, & working lights.

* who is the Hungarian contact for us. Any production manager there to tell us some timing? Order machinery for installing the set? Rules for the pool? And maybe many more questions to come. Or should we speak to Adam G?

Pls advice

Thank you
